

EXPERIENCE

QESTIT Malmö AB

Penetration Tester

July 2023 - Present

Specialized in assessing web applications, APIs, networks, IoT devices, and Active Directory security to identify and exploit vulnerabilities. Experienced in misconfiguration exploitation, privilege escalation, and bypassing defenses to simulate real-world threats. Proficient in tools such as Burp Suite, Metasploit, and custom exploit development. Conducted detailed security assessments and provided actionable remediation strategies to enhance overall security posture.

QESTIT Malmö AB

Penetration Testing Intern (Paid)

Jan. 2023 - July 2023

Performed in-depth vulnerability assessments, exploit development, and security automation to identify and mitigate security risks. Executed simulated attacks and developed tailored security strategies to strengthen system defenses. Automated testing workflows to improve efficiency and streamlined the reporting process. Communicated findings effectively to both technical and non-technical stakeholders, supporting informed security decisions. Gained hands-on experience in addressing complex cybersecurity challenges in real-world environments.

ADDQ 4 AB

Penetration Testing Intern

Jan. 2021 - Dec. 2022

Conducted security assessments to identify vulnerabilities in systems and applications, providing detailed reports with mitigation strategies. Gained hands-on experience in real-world cybersecurity challenges under the guidance of industry professionals. Assisted in enhancing digital resilience for clients by refining penetration testing methodologies and improving security measures.

EDUCATION

University of Gothenburg

Computer Software Engineering

Aug. 2020 - June 2023

Bachelor of Science - BSc

University of California, Santa Cruz

Anthropology

Dec. 2016 - Dec. 2017

Santa Monica College

Social and Behavioural Science

Dec. 2011 - Dec. 2015

Associate of Arts - AA

CERTIFICATES

Certified Penetration Testing Specialist (CPTS)

Hack The Box

Jan. 2025

CyberOps Associate

Cisco

Aug. 2021

AWARDS

Best Research Paper Award

25th International Conference on Product-Focused Software Process Improvement

Dec. 2024

Awarded for the paper titled 'Guidelines for Supporting Software Engineers in Developing Secure Web Applications' presented at the conference.

PUBLICATIONS

Guidelines for Supporting Software Engineers in Developing Secure Web Applications

Springer, Cham

Nov. 27, 2024

Bachelors Thesis on secure web application development presents a set of security guidelines to assist software engineers in mitigating threats. Developed through a design science research study, these guidelines are based on interviews with 10 industry practitioners and validated through a survey of 28 respondents.

SKILLS

Penetration Testing Tools — BurpSuite, Metasploit, Wireshark, Nessus, Sliver, Nmap, ...etc • Programming Languages — ShellScript, PowerShell, C, C#, C++, Golang, Rust, Lua, Python, Java, JavaScript, TypeScript, R, PHP, Haskell, Nix, SQL, NoSQL, ...etc • Operating Systems — Windows, Linux, MacOS, Android, iOS, Debian, Archlinux, Kali Linux, Parrot OS • Frameworks, Paradigms, and Technologies — MITRE ATT&CK, NIST Cybersecurity Framework, Penetration Testing Execution Standard (PTES), OWASP, CVSS Scoring, Active Directory, Software Development Life Cycle, Docker, Git, Kubernetes, CI/CD, DevOps, Agile, Scrum, Vue, React, and more
